

Common Transformations

1. Remove Duplicates
 - Trim / Clean / Format Text
 - Extra spaces in CustomerName
 - Inconsistent casing
2. Change Data Types
 - Order_Date is text
 - Qty & UnitPrice should be numbers
3. Remove Columns
 - Remove the Column Remarks
4. Rename Columns
 - Order_ID → OrderID
 - Customer_Name → CustomerName
5. Remove (Or Filter rows)
 - Order_Date = "text"
 - CustomerName is NULL
6. Replace Values
 - MH → Maharashtra
 - DL → Delhi
7. Split column By Delimiter
 - Split City-State into: City, State
8. Merge Columns
 - Create Full Location = City + State
9. Add Custom Column (M Formula)
 - Create Total Amount = Qty × UnitPrice
10. Conditional Column
 - Create Sales Category:
 - Total Amount ≥ 50000 → "High"
 - Else → "Low"
11. Group By (Aggregations)
 - Find Total Sales by Salesperson
 - Maximum Sales for State
 - Average Sales by Person
12. Pivot / Unpivot
 - Unpivot Qty & UnitPrice for analysis.
13. Merge Queries (Join Tables)
 - Create a Merge Query with Products Table (Left Outer Join)

14. Append Queries

- Append Sales 2023 and Sales 2024

15. Fill Up / down

- Fill Missing Salesperson Values
